Addendum 1

JPS Structured Cabling

Clarifications:

Parkside:

- For the fiber at Parkside, Base bid should be water block single mode fiber.
- Provide an alternate bid for doing transitions between Unit D & C as well as Unit J & K
- There is 1 – 4” conduit being provided underground for the transitions between Unit D & C and Unit J & K. They will be underground and go up the side on the building on either side.

Lincoln:

- Unit A cabling should be white in color. All jacks should conform to the color in the RFQ.
