

Customized Training

Written by Administrator

In addition to our standard list of courses, The Academy for Manufacturing Careers can offer top-quality customized manufacturing-related assessment and/or training to suit your company's specific needs. We can deliver assessments and training at our site, at your location using your equipment and materials, or practically anywhere that's convenient for you and your employees.

Need a four-hour Blueprint Reading refresher using your company's prints? Want it on third-shift on a Saturday? No problem! We're not kidding.

We can do everything from training to use simple standard tools to specialized CAD, CAM and other software training. If we don't already have a customizable program on our books, we will reach out to our vast partnership network to bring you the assessment and/or training solution you need at a price you can afford.

Here are just a few examples of the kinds of customized training we can provide:

- Supervisor/Team Leader
- Press Brake Operator
- Screw Machine Operator
- Process Costing
- Activity-Based Costing
- 5S/Visual Workplace
- Error Proofing
- LEAN Principles with Simulation
- LEAN Sigma Service
- Kaizen Implementation
- Quick Changeover (QCO)/SMED
- Standardized Productive Maintenance (TPM)
- Transactional LEAN Office
- Value Stream Mapping
- Six Sigma
- Production Preparation Process (3P)
- Advanced Product Quality Planning (APQP)
- Failure Mode & Effects Analysis (FMEA)
- Production Parts Approval Process (PPAP)
- Measurement Systems Analysis (MSA)
- Statistical Process Control (SPC)
- Problem-Solving
- Root Cause Analysis
- Sustainability (Green) Manufacturing Principals

Customized Training
